SUMMARY

Technical writing and translation manager with 8+ years leading documentation for enterprise developer platforms. Experienced in docs-as-code (Markdown, MDX, Docusaurus), operational runbooks, API and UI documentation, and cross-functional release workflows. Led distributed writer teams, edited offshore translation drafts, and implemented process improvements from idea through production. Background in IT support and portal development adds depth in troubleshooting, SME collaboration, and platform operations.

PORTFOLIO

Selected case studies in developer documentation, operational runbooks, process analysis, and documentation platform design: ezo001.github.io/dev-docs

CORE SKILLS

Documentation: Developer docs, API/UI reference, runbooks, job aids, process documentation, information architecture, style guides

Tools and platforms: Markdown/MDX, Docusaurus, Git/GitHub, Microsoft Word, SharePoint, Azure Static Web Apps

Practice: Docs-as-code, release documentation, SME interviews, offshore edit/review, translation polish, leadership reporting

Certifications: ITIL V3 Foundation

PROFESSIONAL EXPERIENCE

Technical Writing & Translation Manager

Accenture · Chicago, IL · 2017–Present

- Lead a small, distributed team of technical writers supporting developer portal documentation across multiple product areas and release cycles.
- Own documentation workload planning, release timing, and status reporting for leadership stakeholders.

- Architected and documented a Docusaurus-based, docs-as-code platform spanning 13 product doc sets with unified search, structured navigation, and CI/CD deployment to Azure Static Web Apps.
- Authored operational runbooks and setup guides for SSO integration, authentication configuration, and static-site publishing workflows.
- Designed author-facing job aids and checklists for DOCX-to-Markdown conversion, local preview, and pull-request review.
- Led process gap analyses comparing legacy SharePoint documentation lifecycles with Git-based publishing; recommendations adopted for review gates and author onboarding.
- Edited and polished API and UI documentation drafted by offshore resources for accuracy, consistency, terminology alignment, and release readiness.
- Developed multimedia and procedural content for technical and non-technical audiences, including onboarding and workflow documentation.
- Drove process improvement initiatives from proposal through implementation, including publishing workflow and review standardization.
- Produced weekly status reports and presented documentation risks, progress, and release readiness to leadership.

Senior Desktop Support Consultant

Accenture · Chicago, IL · 2007–2017

- Provided on-site enterprise desktop and mobile support in a high-volume team environment.
- Served on the USTS Portal Development team, collaborating with engineering on internal portal delivery and support readiness.
- Installed, imaged, and troubleshoot Windows PCs and mobile devices across multiple standard builds.
- Identified and closed a process gap that reduced lost asset incidents and improved hardware tracking accountability.
- Completed multiple IT management and infrastructure training courses supporting career progression into technical communication.
